Destrinchando o GCP

Google Compute Engine

Acessar Instância SSH

```
gcloud compute ssh instance-app-01 -zone=us-central1-a
```

Formatar o Disco Novo

```
sudo su -
fdisk -l
fdisk /dev/sdb

# Opções:
n
p
1
w

mkfs.ext4 /dev/sdb1
systemctl stop nginx
mv /var/www/html /var/www/html-backup
mkdir /var/www/html
mount -t ext4 /dev/sdb1 /var/www/html
systemctl start nginx
systemctl status nginx
cd /var/www/html
vim index.html
```
